

Please amend the subject application as follows:

IN THE CLAIMS:

Please cancel claims 20 and 46 without prejudice or disclaimer and accept amended claims 1, 19, 32 and 37 and new claim 47 as follows:

1. (currently amended) A video system comprising:
 - a base portion mounted in a vehicle seat headrest; and
 - a door pivotally attached to the base portion, wherein:
 - the door includes a display and a media player mounted to the door; and
 - a loading point for a data storage medium for the media player is located on the side of the door opposite the display and facing the base portion.
2. (original) The video system of claim 1, wherein the media player is one of a slot-type device and a clamshell-type device.
3. (original) The video system of claim 1, wherein the base portion is one of coupled to an internal headrest support structure and attached directly to the body of the headrest.
4. (original) The video system of claim 1, further comprising a wireless transmitter for transmitting wireless signals.
5. (original) The video system of claim 4, wherein the wireless transmitter includes at

least one of an optical transmitting device and an antenna.

6. (original) The video system of claim 4, wherein the wireless transmitter is capable of transmitting the wireless signals on more than one channel.

7. (original) The video system of claim 4, wherein the wireless signals include at least one of audio signals and video signals.

8. (original) The video system of claim 4, wherein the wireless signals include at least one of infrared (IR) signals and radio frequency (RF) signals.

9. (original) The video system of claim 1, further comprising a port for connecting to an external device.

10. (original) The video system of claim 1, wherein the display is mounted on a front side of the door and the media player is mounted on a backside of the door.

11. (original) The video system of claim 1, wherein the door pivots in a range of angles including approximately 0° to 180° with respect to the base portion.

12. (original) The video system of claim 1, further comprising a cover for covering the display.

13. (original) The video system of claim 1, wherein the door is pivotally attached to the base portion with a hinge.

14. (original) The video system of claim 13, wherein the hinge is positioned at a top, bottom or side portion of the door.

15. (previously presented) The video system of claim 1, wherein:

the display and the media player are capable of operating when the door is in a closed position; and

the data storage medium is inserted into the media player when the door is in an open position.

16. (original) The video system of claim 1, wherein the vehicle seat headrest includes at least one vent for dissipating heat.

17. (original) The video system of claim 1, wherein the vehicle seat headrest includes a fan.

18. (original) The video system of claim 1, wherein the media player includes at least one of a DVD player, a CD-ROM player, a video game player, a videocassette player, a television tuner, a radio tuner, and a device capable of playing at least one of computerized video files and computerized audio files.

19. (currently amended) A video system comprising:

a base portion mounted in a vehicle seat headrest; and

a door pivotally attached to the base portion, wherein the door includes a display mounted to the door, and wherein the base portion includes a media player mounted in the base portion such that ~~a loading point for a data storage medium for the media player is concealed~~ and the media player is behind the door when the door is in a closed position, the base portion including a first opening in line with a slot in the media player and the headrest including a second opening in line with the first opening for receiving a data media to be inserted into the slot.

20. (canceled)

21. (original) The video system of claim 19, wherein the base portion is one of coupled to an internal headrest support structure and attached directly to the body of the headrest.

22. (original) The video system of claim 19, further comprising a wireless transmitter for transmitting wireless signals.

23. (original) The video system of claim 22, wherein the wireless transmitter includes at least one of an optical transmitting device and an antenna.

24. (original) The video system of claim 22, wherein the wireless transmitter is capable

of transmitting the wireless signals on more than one channel.

25. (original) The video system of claim 22, wherein the wireless signals include at least one of audio signals and video signals.

26. (original) The video system of claim 22, wherein the wireless signals include at least one of infrared (IR) signals and radio frequency (RF) signals.

27. (original) The video system of claim 19, further comprising a port for connecting to an external device.

28. (original) The video system of claim 19, wherein the display is mounted on a front side of the door.

29. (original) The video system of claim 19, further comprising a cover for covering the display.

30. (original) The video system of claim 19, wherein the door is pivotally attached to the base portion with a hinge.

31. (original) The video system of claim 30, wherein the hinge is positioned at a top, bottom or side portion of the door.

32. (currently amended) The video system of claim 19, wherein:

the display and the media player are capable of operating when the door is in a closed position; and

the data storage medium is inserted into the media player when the door is in an open or closed position.

33. (original) The video system of claim 19, wherein the vehicle seat headrest includes at least one vent for dissipating heat.

34. (original) The video system of claim 19, wherein the vehicle seat headrest includes a fan.

35. (original) The video system of claim 19, wherein the media player includes at least one of a DVD player, a CD-ROM player, a video game player, a videocassette player, a television tuner, a radio tuner, and a device capable of playing at least one of computerized video files and computerized audio files.

36. (original) The video system of claim 19, wherein the base portion includes a cavity for selectively housing the media player.

37. (currently amended) A video system comprising:

a display mounted in a vehicle seat headrest; and

a media player mounted in the vehicle seat headrest, wherein the media player is

connected to the display and to a data bus transmitting data from the media player or receiving data for the media player to or from at least one location outside the vehicle seat headrest.

38. (original) The video system of claim 37, further comprising:

a base portion mounted in the vehicle seat headrest; and

a door pivotally attached to the base portion, wherein the door includes the display and the media player mounted to the door.

39. (original) The video system of claim 37, further comprising:

a base portion mounted in the vehicle seat headrest, wherein the base portion includes the media player mounted in the base portion; and

a door pivotally attached to the base portion, wherein the door includes the display mounted to the door.

40. (original) The video system of claim 37, wherein the vehicle seat headrest includes an opening in line with a slot in the media player for receiving a data media to be inserted in the slot.

41. (original) The video system of claim 37, wherein the media player is one of a slot-type device and a clamshell-type device.

42. (original) The video system of claim 37, further comprising a wireless transmitter

capable of transmitting at least one of video and audio signals to at least one of wireless headphones and a slave display.

43. (original) The video system of claim 37, wherein the media player includes at least one of a DVD player, a CD-ROM player, a video game player, a videocassette player, a television tuner, a radio tuner, and a device capable of playing at least one of computerized video and audio files.

44. (original) The video system of claim 37, further comprising:

a base portion mounted in the vehicle seat headrest, wherein the base portion includes a cavity for selectively housing the media player, and the display is attached to the base portion.

45. (original) The video system of claim 44, wherein the display is pivotally attached to the base portion.

46. (canceled)

47. (new) The video system of claim 37, wherein the data bus is connected to a second display in a second headrest for transmitting the data from the media player to the second display.
